The National University of Singapore (NUS), which may be Singapore’s fifth public university, is a hit with polytechnic graduates. A record 5,000 polytechnic diploma holders vied for the 1,000 places offered this year. Last year, 4,000 applied for the 1,000 places offered.

With the addition of seven new courses this year, the institute, which runs the courses on its decentralised campuses in the polytechnics, offers niche degrees in subjects ranging from culinary arts to aeronautical engineering and design to preschool education.

The Singapore Institute of Technology (SIT), which runs the courses on its decentralised campuses in the polytechnics, offers niche degrees in subjects ranging from culinary arts to aeronautical engineering and design to preschool education.

Record numbers vie for places at Singapore Institute of Technology
